

Product Fact Book

Sportiva Compact

Sportiva Compact

- ❏ Successor of Sportiva T65, T70
- ❏ New development for the compact segment
- ❏ Well balanced, asymmetric tread pattern
- ❏ Modern, 3 circumferential groove pattern design
- ❏ 25 sizes from 13 to 15 inch
- ❏ From 80 to 55 ratio aspect
- ❏ For speed categories T and H

Technical Performance

Sportiva Compact - Performance

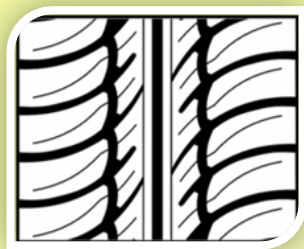

Technical Performance

- ❏ Improved performance on dry roads
- ❏ Excellent noise and comfort performance
- ❏ Improved results in rolling resistance and wear
- ❏ Increased mileage
- ❏ Good wet performance in handling, braking and in aquaplaning situations

Sportiva Compact - Technical Highlights

Dry Performance

Feature

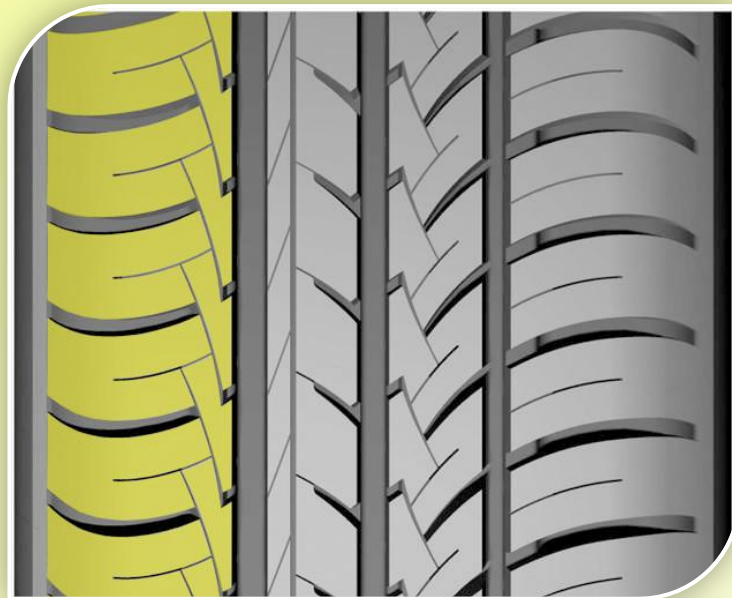

- ❖ closed shoulder blocks at the outer shoulder combined with a stiff circumferential rib
- ❖ solid, circumferentially-orientated tread block structure

Effect

- ❖ adapted tread block stiffness

Benefit

- ❖ very good handling characteristics on dry straight and curved roads

Sportiva Compact - Technical Highlights

Noise and Comfort

Feature

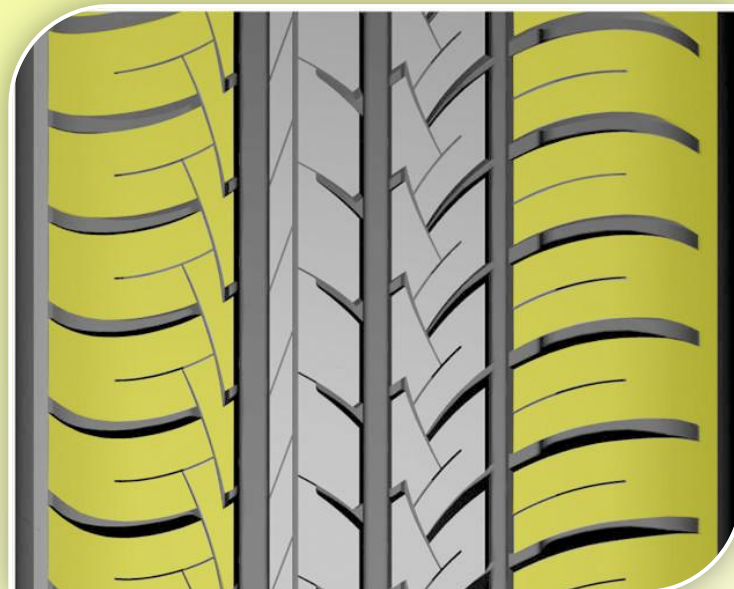

- ❖ consistent narrow width and uniform inclination angle in the shoulder grooves
- ❖ shift in the longitudinal direction between the inner and outer shoulder

Effect

- ❖ rolling noise is eliminated by the optimized frequency overlay

Benefit

- ❖ reduced noise level and optimized driving comfort

Sportiva Compact - Technical Highlights

Rolling Resistance and Wear

Feature

- ❏ new, modern compound containing silica with good rolling and wear resistance
- ❏ compact pattern block structure with optimised distribution of stiffness in the tread

Effect

- ❏ low rolling resistance and increase of wear life
- ❏ even pressure distribution in the ground contact patch

Benefit

- ❏ reduced fuel consumption, even wear and increased mileage performance

Sportiva Compact - Summary

Feature

Effect

Benefit

Dry

- ❖ Closed shoulder blocks at the outer shoulder combined with a stiff circumferential rib

- ❖ Adapted tread block stiffness

- ❖ Very good handling characteristics on dry roads

Comfort

- ❖ Consistent width and angle of the shoulder grooves
- ❖ Optimized shift in the longitudinal direction

- ❖ Rolling noise is eliminated by the optimized frequency overlay

- ❖ Reduced aquaplaning risks and high safety on wet surfaces

wear

- ❖ New, modern compound
- ❖ Compact pattern block structure

- ❖ Low rolling resistance
- ❖ Even pressure distribution in the ground contact patch

- ❖ Reduced fuel consumption, even wear and increased mileage performance
